### Directions for Use

**RESTRAINTS:** Do not spray in hot weather - Do not apply 21 days before or after an oil spray.

#### CROP | PEST | RATE ml | COMMENTS
--- | --- | --- | ---
**CITRUS** | Brown Citrus Rust Mite | 200-500 | Spray July-August with thorough coverage.Use the higher rate for heavy infestations.
| Citrus Bud Mite | 400-500 | Either spray at petal fall with Rutec Copper or apply on its own during Spring or Autumn.Use the higher rate for heavy infestations.
| Citrus Rust Mite | 400-500 | | |
| White Louse Scale | 100-200 | | |

#### GRAPE

- **Grapeleaf Blister Mite**
- **Grapeleaf Rust Mite**
- **Powdery Mildew**

Apply at 2-4 week intervals depending on the incidence of the pests. Use the higher rate for heavy infestations.

#### ORNAMENTALS

- **Two-spotted Mite**
- **Powdery Mildew**

Apply when pests or disease is first seen and repeat as necessary.

#### POME FRUIT

- **Black Spot (Scab)**
- **Powdery Mildew**

Apply at pink bud, petal fall and at intervals of 2-3 weeks.

Some varieties are sulfur sensitive and care should be taken when spraying these varieties. Never spray them when hot or with the full dose rate.

#### STONE FRUIT (except apricots)

- **Brown Rot**
- **Rust**

Apply 4 weeks after petal fall and then as cover sprays.

#### VEGETABLES (except cucumbers and rockmelons)

- **Bean Spider Mite**
- **Powdery Mildew Rust**
- **Tomato Russet Mite**
- **Two - Spotted Mite**

Apply when pet or disease is first seen and repeat as necessary. Use the higher rate in crops with a large leaf cover or when conditions favour disease or mite development.

**NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**

There is no withholding period for Rutec Sulfur when used as directed.

**NRA Approval No.: 51818/0699**

---

### General Instructions

Mixing - Shake the container well before use.

Place half of the water in the spray tank, add the required amount of Rutec Sulfur whilst agitating, then add the re- maining water. Maintain agitation until spraying is completed. The addition of Rutec Wetta 1000 at 0.1% of the water volume, spray retention and rain fastness is strongly recommended. After spraying, empty all filters, spray lines etc.

Rutec Sulfur is compatible with a wide range of other crop protection chemicals and micronutrients, provided vigorous agitation. When mixing with Rutec Copper, make sure Rutec Sulfur is fully dispersed before adding Rutec Copper. It is recommended that the sulfur is added to the other diluted pesticide and agitation is maintained throughout the mixing process. The mixing level must be observed. Do not mix with deltamethrin, D.S.M., mineral oils and high N fertilisers. Consult Rutec if in doubt.

**PROTECTION OF CROPS**

- Do not spray cucumbers, rockmelons, apricots, raspberries and other sulfur sensitive plants. Reduce the dosage on some varieties of stone fruit, vegetables and ornamentals.

**Fungicide Resistance Warning**

Rutec Sulfur is a member of the multi-site activity group of fungicides. For fungicide resistance management Rutec Sulfur is a Group Y fungicide. Some naturally occurring individual fungi resistant to Rutec Sulfur and other Group Y fungicides may exist throughout New South Wales. These individuals can eventually dominate the fungal population if these fungicides are used repeatedly. These resistant fungi may result in a reduction in efficacy and possible yield loss.

Since the occurrence of resistance fungi is difficult to detect prior to use, Rutec Pty Ltd. accepts no liability for any losses that may result from the failure of Rutec Sulfur to control resistance fungi.

**PRECAUTIONS**

- Avoid application under extremes of climate, eg. Rapid drying conditions, extremely slow drying conditions, frost, rain or when frost and rain are anticipated.

**STORAGE**

**KEEP OUT OF REACH OF CHILDREN**

Store in the closed, original container, in a well-ventilated area as cool as possible. Do not store for prolonged periods in direct sunlight.

**SPILLS MANAGEMENT**

Hose small spillage (less than 1 litre of concentrate) away with a large excess of water. Large spillage should not be directed to drains. Large spillage should be absorbed in sawdust or dry sand.

**DISPOSAL**

- Triple or preferably pressure rinse containers before disposal. Add rinsate to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

**PREFERENCES OF WILDLIFE, FISH, CRUSTACEAN AND ENVIRONMENT**

- Protection of wildlife, fish, crustaceans and environment.

Do NOT contaminate streams, rivers or waterways with the chemical or used containers. Do not mix with deltamethrin, D.S.M., mineral oils and high N fertilisers. Consult Rutec if in doubt.

**FIRST AID**

If poisoning occurs, contact a doctor or Poisons Information Centre (Ph: 13 11 26).

**MATERIAL SAFETY DATA SHEET**

Additional information is contained in the Material Safety Data Sheets.
